The Vehicle Route Optimization - Level 1 (VRO-1) exam is an 20-question multiple choice exam administered during a 120-minute session. The minimum passing score is 80%.

Holders of the VRO-1 certification demonstrated beginner-level proficiency using LLamasoft Transportation Optimization technology, including the ability to interpret scope and data to build and update a basic model, design scenarios and retrieve output to answer basic business questions, and resolve basic sources of infeasibility and failure.
